

The Problem With Prescriptions:

Right now, generic Lipitor costs \$150 at one major pharmacy chain but the **exact same medication is FREE** at a pharmacy across the street. ***Prescription drugs cost too much.***

You probably already knew drugs were expensive. **But did you know:**

Prices for prescription drugs vary widely between pharmacies, since **prescription drug prices are not regulated.** ***Your co-pay may not be your lowest price.*** For example, hundreds of generic medications are available for \$4 or even free without insurance ...if only you would know where to go. Your insurance co-pay of \$10 doesn't sound so great if we can help point you to the **exact same drug for 60% less.** Plus, many insurance plans have high deductibles or limited formularies that don't cover the drugs you need. Lastly, even insured people buying covered brand-name drugs would probably want to know about how they could save \$500 or more per year.

Your doctor may not know how much your drugs cost. A doctor's primary job is to make sure that you receive the best care, **not track costs.** It is important that **YOU know**, so that you don't leave the doctor's office with a prescription that you can't (or don't want to) fill.

NEVER until recently has there been easy way to find discounts in one place and know the best price for your drug.

Key Benefits:

- **100% free and easy to check on getting a better price.**
- **58% Savings vs. Cash Prices** (highest in the industry).
- ***Can Save Money for People with or without Health Insurance!***
- **Medicare Part D isn't always the cheapest way to buy your prescriptions.**
- **Data You Can Trust!**
- ***No personal information required.***
- **Easy-to-use free iPhone and Android app. Find and redeem prescriptions directly from a mobile phone!**

Daveco Insurance will forward the ***discount prescription*** partnership information to client **upon approval of Insurance Plan(s) chosen.**
